

Subsurface engineering, geosciences and production engineering experts

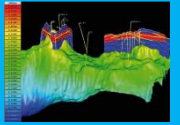

Specialist Disciplines

- Well testing
- Pressure transient analysis
- Reservoir engineering
- Reservoir surveillance
- Reservoir simulation
- Integrated reservoir modelling
- Geology, Geophysics, Petrophysics
- Production technology
- Drilling & completions engineering

About OPC

Established in 1988, Oilfield Production Consultants (OPC) is a global technical services consultancy providing fully integrated geosciences, subsurface engineering, production technology, reservoir surveillance and management expertise to NOCs, IOCs and Independents in the oil and gas exploration and production industry

We deliver
Projects

We have expert
Consultants

We **train** and
mentor

"OPC are very talented industry subject matter experts in a wide range of upstream E&P activities; especially subsurface areas. They provide great subject matter expertise and are highly reliable; always delivering on what is promised."

www.opc.co.uk

"We use OPC as a specialist Geophysics and Subsurface manpower supplier. Of all the consultant services proved by agencies I can honestly say that OPC were by far head and shoulders above the rest."
